

Due to the COVID-19 pandemic, Amgen is now offering

At-Home Nurse Injection Program

For your new or existing Prolia[®] patients who need help getting their injection

Who are unable/unwilling to leave home **OR** **Who do not have an available treatment site in their area**

If eligible, as a temporary option during the COVID-19 pandemic, patients can have Prolia[®] administered right in their homes by a Home Health Registered Nurse (RN).

While Prolia[®] is covered under the pharmacy benefit for these patients (any applicable patient co-pays still apply), the nurse visit and administration of the injection would be provided at no cost.

Is your patient a candidate for at-home administration of Prolia[®]?

Program eligibility requirements

- New or existing Prolia[®] patient who is due for injection
- Patient has pharmacy benefit coverage for Prolia[®] (confirm if patient's health plan mandates a specific specialty pharmacy)
- Patient resides within the contiguous United States, Hawaii, or Alaska

Confirming patient readiness

- Patient agrees to at-home administration process and allows nurse into the home
- Patient understands program details and their responsibility in the Prolia[®] At-Home Nurse Injection Program (eg, refrigerating Prolia[®] upon home delivery¹)

Refer to page 2 to learn how the Prolia[®] At-Home Nurse Injection Program works.

How does the Prolia® (denosumab) At-Home Nurse Injection Program work?

YOUR OFFICE'S ROLE

YOUR PATIENT'S ROLE

STEP 1: INITIATION

- Send the prescription to the patient's qualifying pharmacy* for home delivery
 - A prior authorization may be required
 - Let your patient know to expect a call from their qualifying pharmacy*
- If out-of-pocket (OOP) costs are a concern for your patient, contact Amgen Assist® for information on appropriate financial support options

- Your patient will receive a call from the pharmacy to
 - Review OOP costs
 - Collect co-pay
 - Confirm address
- When Prolia® is delivered, your patient will need to put it in the refrigerator at 36°F to 46°F in the original carton¹

STEP 2: ADMINISTRATION

- Send the Intake Form to the UBC Prolia® Support Team
- Let your patient know to expect a call from the Home Health RN

- Your patient will receive a call from the Home Health RN to set up an appointment
- On the day of the appointment, your patient will need to remove Prolia® from the refrigerator at least 30 minutes prior to the Home Health RN's arrival and keep it at room temperature (up to 77°F) in the original carton¹
- Patient receives Prolia® injection from the Home Health RN

STEP 3: FOLLOW-UP

- Your office will receive confirmation from the UBC Prolia® Support Team that Prolia® was administered
- Contact your patient to set up the injection

- The process takes approximately 10 days once you've sent the Intake Form to the UBC Prolia® Support Team. The timeline is also dependent on whether your patient is available during this time
- Depending on your patient's insurance, Amgen Assist® can provide applicable information on appropriate programs, such as the Prolia® Co-pay Card Program, that can help eligible patients pay for the Prolia® you've prescribed. Amgen Assist® can be contacted at **1-866-AMG-ASST (1-866-264-2778)**

For additional assistance or more information on the Prolia® At-Home Nurse Injection Program, contact ProliaSupport@ubc.com

*A qualifying pharmacy is one that is covered by the patient's insurance.
